

Fathom Learning helped us to develop the management and leadership capability of our management team

“

Working in partnership with us, Fathom Learning put together an 18 month development programme for our management team. **They listened to us,** taking on board our organisational challenges and development needs, **and produced a programme that would support our current and future needs.** It provided a balance of theory and real-life situations which managers related to – and made it fun too!

I particularly value the way Fathom regards our organisation as unique –

Testimonial

everything is tailored to our requirements.

Fathom Learning continues to support us and our management team with follow up sessions, which provides continuity for the team and support in achieving our strategic objectives.
